EXPERIENCE

Amazon Web Services (AWS)

September 2025 – December 2025

Software Development Engineer Intern

Vancouver, BC, Canada

- Built a **C++** and **Java** middleware layer for Oracle Database on AWS that intercepts requests and delivers customer availability zone mappings to OCI, processing **5M+ daily requests**
- Designed a custom caching layer preloaded with frequently accessed configuration data from DynamoDB at Lambda initialization, cutting lookup latency to **under 3ms** and maintaining stability under peak load
- Refactored storage models and workflow APIs to enable private-network service integrations for **10K+** Oracle Database networks shared through AWS Resource Access Manager (RAM)
- Led an AI workshop for **40+** engineers on codebase organization and prompt-driven development with LLMs

Shopify

May 2025 – August 2025

Software Engineer Intern

Toronto, ON, Canada

- Protected **40M+** monthly active users by implementing session invalidation logic in **Ruby** that automatically logged out accounts when third-party credentials were compromised
- Delivered **GraphQL** OAuth endpoints for headless eCommerce store logins, adopted by **2M+** merchants
- Engineered a **Python** CLI tool using **MCP** servers to surface internal Slack channels, docs, and code diffs through natural language search
- Created **React** components letting merchants add social identity providers (Google, Facebook, Shop) to their store

Ansys

May 2024 – December 2024

Software Engineer Intern

Waterloo, ON, Canada

- Migrated compute-heavy workflows from a desktop product to a cloud-based web application using **C++** backend services, **React**, and **REST APIs**, offloading processing to the cloud for **1M+** users
- Developed **C++** modules for a GPU-accelerated graphics engine compiled to WebAssembly, enabling real-time 3D simulation visualization in the browser
- Built a shortcut framework with **React** and **Redux** adding customizable hotkeys to a web-based 3D model viewer

Google Developer Student Club

August 2023 – August 2024

President

Guelph, ON, Canada

- Founded Guelph's Developer Student Club, growing it to **300+** members in less than a year
- Raised **\$25K+** from sponsors and managed **30** people across multiple teams to coordinate a 3-day hackathon that hosted more than **200** participants, included **20+** workshops, and received recognition from Google

Saige

January 2023 – August 2023

Software Engineer Intern

Vancouver, BC, Canada

- Developed and deployed a multi-channel notification system to production using **AWS** (Lambda, SQS, SNS), **Firebase**, and Twilio, delivering email, SMS, and push notifications to **10K+** monthly active users
- Led the redesign of a user dashboard in **React**, overseeing 3 interns and delivering the project **2 months early**

PROJECTS

LinkedIn Portfolio Generator | TypeScript, React, Claude AI, Amazon Web Services

- Designed a serverless LLM portfolio pipeline on AWS with multi-tenant subdomain hosting, serving **100+** users

Agentic Writing Platform | TypeScript, React, Vercel AI SDK, Google Cloud Platform

- Launched an agentic document editor with multi-step reasoning for research and writing, growing to **1K+** users

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript, TypeScript, Java, Ruby, Go, SQL, HTML, CSS

Technologies: React, Redux, Next.js, Node.js, Express, Flask, Cypress, AWS, GCP, Docker, GraphQL

EDUCATION

University of Guelph

September 2022 - May 2026

Hons. Bachelor of Computing, Computer Science (GPA 3.94 / 4.00)

Guelph, ON, Canada
